We would like to recruit additional Hematologists to join our benign and malignant Hematology team at the Parkview Cancer Institute. The ideal candidate is an upcoming or recent graduate with interest and expertise in CAR-T therapy. Those with Bone Marrow Transplant fellowship would be of need as well. Additionally, we are open to established hematologists with an interest in benign disease or research with malignant hematologic.

Our physicians have the opportunity to work a 200,000 square foot state of the art cancer institute located in Fort Wayne, Indiana. Attached to a tertiary regional medical center, The Parkview Cancer Institute opened it’s doors in June 2018 and is attached to a tertiary regional medical center.

Parkview Cancer Institute enhances clinical care by incorporating a multidisciplinary approach to care involving medical oncologists, radiation oncologists, surgical subspecialties, and other specialties. We also have a robust research infrastructure and teaching opportunities. The cancer institute serves as a tertiary care referral center. Connections to industry for trials and opportunities for cooperative and investigator-initiated research if there is an interest. All patients are reviewed at Tumor Board, and supported by robust navigation and supportive care infrastructure.

The clinical model involves working in multi-specialty tumor site teams, and predominantly outpatient practice with a limited call at a single tertiary hospital. We have a subspecialty medical oncology & hematology & cancer surgery approach. Our hematology division consists of 4 dedicated hematologists who focus on a myriad of benign and malignant diseases is dedicated to being experts in the region related to hematology.

Email CV’s to Kelly Walker, Kelly.walker@parkivew.com.
A Staff Clinician position is available in the Immune Deficiency-Cellular Therapy Program of the Center for Cancer Research (CCR), National Cancer Institute (NCI), National Institutes of Health (NIH). Dr. Dennis Hickstein is seeking a Staff Clinician responsible for patient care responsibilities and to participate in clinical research studies in transplantation for patients with GATA2 deficiency and VEXAS, a recently described inflammatory bone marrow syndrome, as well as other primary immunodeficiency diseases.

The successful candidate must have an M.D. degree or equivalent, be a board eligible or board certified internist who has completed a hematology or oncology fellowship or have similar professional experience. He or she must demonstrate ability to provide high quality patient care for individuals undergoing hematopoietic stem cell transplant in clinical research trials.

The successful applicant will be appointed at a salary commensurate with his/her qualifications and experience. Full Federal benefits including leave, health and life insurance, long-term care insurance, retirement, and savings plan (or equivalent) will be provided.

Interested individuals should send a cover letter, curriculum vitae and bibliography, a brief statement of research interests and accomplishments, description of clinical experience, and the names and addresses of three references to:

Dennis D. Hickstein, M.D.
Center for Cancer Research, National Cancer Institute
Email: hicksted@mail.nih.gov

Applications will be accepted until the position is filled.

HHS, NIH, and NCI are Equal Opportunity Employers.

The NIH and NCI are dedicated to building a diverse community in its training and employment programs and encourages the application and nomination of qualified women, minorities, and individuals with disabilities.
Called to Care
