The Division of Hematology Oncology in the Department of Pediatrics at Benioff Children’s Hospital in the University of California, San Francisco, is recruiting a new faculty member who specializes in pediatric cancer immunotherapies. The ideal candidate will participate in clinical activities but be primarily research based, either in the laboratory or in early phase clinical trials utilizing immunotherapy. The faculty member will attend on the pediatric inpatient and outpatient services. The appointment will be made at Assistant, Associate or Full Professor rank of In Residence or Clinical X faculty series. Appropriate research space will be negotiated for candidates with a laboratory based research program.

Required qualifications include:

- Medical Degree
- CA License or eligible for a CA license
- Board certification in Pediatrics and subspecialty certification or eligibility in Pediatric Hematology Oncology
- Commitment and experience in teaching and research is essential

The University of California San Francisco (UCSF) is one of the top biomedical research institutions in the nation and is ranked 1st among public universities in NIH funding in 2018. The Department of Pediatrics trains 84 pediatric residents, 83 fellows, and 31 post-doctoral fellows. The Department's clinical enterprise is based at UCSF Benioff Children's Hospital San Francisco, UCSF Benioff Children's Hospital Oakland, Mount Zion, Zuckerberg San Francisco General, and at a number of outreach clinics throughout Northern California, providing the Department with an unsurpassed opportunity to meet the needs of infants, children, and young adults throughout the Bay Area. In 2020, UCSF Benioff Children’s Hospitals ranked in all 10 children's specialties in U.S. News and World Report. Nestled in a dynamic and unique geography distinguished by unprecedented innovations in technology, UCSF and the Department of Pediatrics are able to bring research and industry together to advance health. Dedicated cell processing space is available in the Mission Bay Hospital in order to facilitate the translation of unique immunotherapies to patient care.

Interested candidates can apply online at https://aprecruit.ucsf.edu/JPF02974 with a cover letter, curriculum vitae, statement of contributions to diversity, and statement of research accomplishments. Applicant's materials must list current and pending qualifications upon submission.
